The Intra-Fallopian Device

Empowering Choice, Preserving Futures – Reversible, Reliable, Revolutionary

of sexually-active women used at least one form of contraceptive method

of these women use a long-acting reversible contraceptive method

Even with its high efficacy, 1 in 1,000 women still experience IUD failure, which can result in uterine perforation. Many more experience pain/discomfort during the insertion

**WE ARE THE TEAM PIONEERING A
GROUNDBREAKING REVERSIBLE
CONTRACEPTION METHOD—100% EFFECTIVE,
MINIMALLY-INVASIVE, AND DESIGNED TO
EMPOWER WITHOUT REGRET.**
